

# Bader Mahdawi (DRAFT)

---

## SKILLS

**HTML:** Proficient in creating structured and semantically correct web pages using HTML5.

**CSS:** Skilled in implementing responsive designs and styling web pages using CSS3.

**JavaScript:** Strong understanding of core JavaScript concepts and proficient in using it to create interactive web applications.

**React:** Experienced in building user interfaces and web applications using the React library.

**Node.js:** Knowledgeable in developing server-side applications and RESTful APIs using Node.js.

**MySQL:** Proficient in working with relational databases, designing schemas, and writing optimized SQL queries in MySQL.

**MongoDB:** Familiarity with NoSQL databases, specifically MongoDB, and proficient in utilizing its features and querying data.

**GraphQL:** Understanding and experience in implementing GraphQL APIs for efficient data retrieval and manipulation.

**Version Control:** Proficient in using Git and understanding of version control principles for efficient collaboration and code management.

**Problem Solving:** Strong analytical and problem-solving skills, with the ability to approach complex challenges and find effective solutions.

**Responsive Web Design:** Knowledgeable in creating mobile-friendly and responsive web designs using media queries and CSS frameworks.

**Debugging and Testing:** Skilled in identifying and resolving issues through effective debugging techniques and conducting thorough testing for optimal performance.

## EXPERIENCE

UC Berkeley Full Stack Web Development Bootcamp |

During my time at the UC Berkeley Full Stack Web Development Bootcamp, I gained comprehensive knowledge and practical experience in web development technologies and best practices. The intensive program equipped me with the skills necessary to excel in front-end and back-end development, as well as the ability to work effectively within a team.

Throughout the bootcamp, I completed a series of hands-on projects that involved building responsive web applications using HTML, CSS, JavaScript, React, Node.js, MySQL, MongoDB, and GraphQL. These projects allowed me to apply my theoretical knowledge in a practical setting, solidifying my understanding of full stack development principles.

Additionally, the bootcamp emphasized industry-standard development practices, including version control using Git and collaboration through Agile methodologies. Through individual and group projects, I gained valuable experience in problem-solving, debugging, and testing, ensuring the delivery of high-quality, efficient code.

While my professional experience is limited due to recently graduating from the bootcamp, I am eager to leverage the skills I have acquired and contribute to a dynamic and innovative team. I am confident in my ability to quickly learn and adapt to new technologies and frameworks, making me a motivated and valuable asset to any organization.

## EDUCATION

### **UC Berkely, Online** – *Certificate*

January 2023 – July 2023, Online

UC Berkley Full Stack Web Development Obline Bootcamp
